The combination of newspapers in his latest catalogue is certainly a widespread and influential one, and could only have been attained by energetic and honorable dealing on the part of the agency representing them. Mr. H. P. Hubbard's relationship with ourselves, and with the newspaper fraternity generally, is of a cordial nature, and we can knowingly commend him to the favor of advertisers and publishers.—*Times and Expositor*, Adrian, Mich.

INSTRUCTIONS TO KEY HOLDERS.

1. On the breaking out of a fire, notice should be immediately communicated to the nearest Alarm Box, Keys of which are always in the hands of the Police, and responsible persons in the vicinity of the Boxes.

2. Key holders, upon the discovery or positive information of a fire, will unlock the box, pull down the slide or hook once, and let go. This gives the desired alarm all over the city, repeating itself five times.

3. All persons giving fire alarms are requested to remain by the box a moment, and if no clicking is heard in the box, pull again; if you still hear no clicking, go to the next nearest box and give the alarm from that.

4. Never signal for a fire seen at a distance. Never touch the hook except to give an alarm of fire. Be sure the box is locked before leaving it. Give an alarm for no cause other than an actual fire. Do not give an alarm for a chimney.

5. Owners and occupants of buildings are requested to inform themselves of the location of the signal boxes near their property, also the places where the keys are kept. Be sure the alarm is properly given. One single stroke of the Alarm Bell and Engine House Gong is not given for an alarm of fire.

6. Alarms will be sounded on the Fire Bells thus: For box 5, five strokes, 1–1–1–1–1, with short intervals and repeating. For box 32, the strokes, 1–1–1, a pause, then two strokes 1–1, a pause, and repeating. Alarms for other numbers are given in a like manner.

7. Ten successive strokes upon the Alarm Bells will be given as a signal for calling out the whole Fire Department.

CAUTION.—Never pull the hook while the Alarm Bells or the Gong in the box are striking. J. MURRAY FAIRCHILD, Sup't.

Collegiate and Commercial Institute,

Nos. 15 and 17 WOOSTER PLACE.

The Institute offers courses of instruction in the Greek, Latin, English, German, French and Spanish languages; Mathematics and the Physical Science; in History, Moral and Political Science; and in Penmanship, Book-Keeping, Drawing, Phonography, Reading and Elocution. The regular course in the department preparatory to Yale College, occupies three years; but full opportunity is allowed to whose who can prepare more rapidly. No student is held or turned back in one of these studies for deficiency in any other; thus avoiding an evil that exists in schools arranged on an annual plan of connected studies. There are special courses arranged for those who are to enter the Scientific School and for those who are to follow business pursuits. The unusual proportion of teachers to pupils, the larger range of studies, and the greater number of classes, formed to meet the wants of the students, make it possible to consult the taste and ability of each pupil, and to allow of his full progress, to a greater extent than can be done in schools whose classes are formed on an arbitrary system only. Parents will find, in the instruction given in Military Drilling, Gymnastics, Swimming, etc., and in the ample grounds for out-door games under careful supervision, just the advantages for physical training and vigor, which boys in cities need. The Boarding Department is designed for pupils who do not reside with near relatives in New Haven, and to secure to them those family advantages and that paternal care and moral and religious discipline which their age so obviously demands.

ARE PREPARED TO COPY

LINE ENGRAVINGS,	WOOD ENGRAVINGS,	PRINTED LETTER-PRESS,
LITHOGRAPHS,	MUSIC,	MAPS, Drawn or Engraved,
ARTISTIC PEN DRAWING,	ARCHITECTURAL PLANS,	MECHANICAL DRAWINGS,
MANUSCRIPT LETTERS,	DOCUMENTS,	ENGINEER'S PLANS,

AND EVERY VARIETY OF LINE WORK BY

OSBORNE'S PROCESS OF

PHOTO-LITHOGRAPHY,

IN THE HIGHEST STYLE OF THE ART

Copies may be had in fac-simile and of any size, whether enlarged, reduced, or of full scale, with absolute accuracy and economy, the transfers being made by Photography instead of the hand of an artist.

Drawings should be done IN LINE, with Black (Indian) Ink, on smooth white paper. The process is not adapted to ordinary photographs, possessing half-tones or tints and views direct from nature, nor drawings shaded in ink or water colors. These are first traced or drawn by our artists in lines. The advantages of this process commercially and artistically are very many, and its products excite general admiration.

We call particular attention to our

PHOTO-RELIEF PLATES

for Letter-press printing. A superior substitute for woodcuts, at much lower rates.

Originals should be forwarded rolled (not folded), when possible.

We also invite attention to the following copies of Line Engravings, which are scarcely distinguishable from the originals, though at one-twentieth the cost.

Size, 24x30, 75 cents each; 22x28, 50 cents; 19x24, 40 cents; 14x21 or 11x14, 25 cents each:

NEW ENGLAND

Conservatory of Music.

THE Conservatory of Music is now so established a fact in France, Germany, Belgium, England, and America, that scarcely any definition of its scope is requisite. It is to music what a college of liberal arts or the university are to education in general, and among certain European nations it is formally recognized by the government with the same liberality that is accorded to other institutions of learning. The great tone-masters, Mendelssohn, David, Joachim, and others that might be named, have earnestly labored to give to musical education the benefit of the advantages of a class system of instruction ; for by this plan they secured to the scholar of average means the services of better teachers and more thorough training than they could otherwise afford, and the general student, instead of pursuing his study amid the solitude and disheartning atmosphere of his own room, was brought in contact with congenial minds, and kept abreast with all the musical influences, literature, and progress of his day. The very atmosphere of a college is favorable to learning. The crowd of students bent on one pursuit ; the eminent teachers ; the class rooms ; the costly and curious apparatus ; the library and daily drill,—all conspire to make study interesting. The Conservatory groups all these advantages around musical instruction. The system that is so beneficial to the study of mathematics, and the higher branches of learning, has been found equally serviceable in attaining a high musical education.

TWENTY-FIVE YEARS have now elapsed since the Director inaugurated the Conservatory system of musical instruction in New England. Beginning in a comparatively small way, as a School of Music, it soon developed into a Musical Institute, and in the year 1867 expanded into a full-grown and well-appointed Conservatory, on the same basis and offering the same advantages as those which have existed in Europe under the patronage of the government, or have been founded by the great composers. The Director's critical personal examination of the most celebrated Music Schools in Europe, and his long experience in conducting the above institution, enable him to employ the most valuable methods, his sole aim being to broaden the area of musical culture in this country, by furnishing the instruction of the best masters, with the greatest number of collateral advantages, at the lowest possible cost to pupils.

The Director remembers with pardonable pride that more than 25,000 pupils have availed themselves of its advantages, many of whom are now prominent members of the musical profession ; and the New England Conservatory is now known as the largest Musical School in the world.

DAVID B. CROCKETT,

MANUFACTURER OF

"No. 1 and 2 Preservative,"

OR ARCHITECTURAL WOOD FINISH,

SPAR COMPOSITION,

CAR and CARRIAGE PRIMING,

Painters' Japan Dryer, etc.

NO. 1 PRESERVATIVE is an article to be used in all places where you wish to keep out dampness or other foul matters that may come in contact with it, on either hard or soft woods. It is also a superior article where you wish to finish woods in their natural color; at the same time it prevents their checking or stripping up, as is the case of hard and soft wood floors. It also renders the woodwork strictly impervious to staining or discoloring from any substance that may come in contact with it, as dirt stains, etc; can be readily removed by simply washing off. It is far superior, and costs less, than shellac, and its great value to Hospitals, Asylums, Public Buildings, etc., demands the attention of Architects and Builders, particularly those in charge of Hospitals and Asylums.

NO. 2 PRESERVATIVE, OR ARCHITECTURAL FINISH, is a coating to be used over the "No. 1 Preservative," where you wish a brilliant and durable finish It will not crack, blister, or turn white, and over grained work has no equal, and is not affected by extreme changes of temperature.

SPAR COMPOSITION is a superior article for all bright work on Vessels and Spars, it being a tough elastic coating for wood or iron exposed to the extremes of weather : is positively waterproof, and is being used extensively on Yachts, Steamers, etc.

CAR AND CARRIAGE PRIMING, or WOOD FILLER, is the most perfect article ever used for the purpose, it having been tested by leading manufacturers, and so pronounced by them. By coating Bodies, Gearing, Wheels, Springs, or any part of the Carriage or Car with one coat of the Primer, you render the wood perfectly preserved from taking in dampness, and they can be put away until such times as you may wish to paint them.

All information as to using the above materials, and price of same, will be furnished by addressing
